BINTANG BASMARA ABDULLAH

AI & Automation Specialist | n8n · Supabase · WhatsApp Cloud API · Claude

Tangerang, Banten, Indonesia • basmarabintang@gmail.com • linkedin.com/in/bintang-basmara-5a347b371 • github.com/basmarabintang-source • Open to work (hybrid / remote)

PROFESSIONAL SUMMARY

AI & automation specialist who works out what a business should automate, then builds it end to end: database, backend, front end and integrations. In five months at a multi-branch Honda dealership, shipped the systems it runs on daily, from its own WhatsApp Business platform to CRM, HR, sales and workshop tools, for 50+ staff and 11,000+ customers. 3,000+ hours of AI-assisted development with Claude, n8n and Supabase. Certified Ethical Hacker (CEH).

CORE SKILLS

- **AI & LLMs:** Claude (Claude Code, API, Agent SDK, subagents), prompt engineering, RAG & embeddings, local AI (Whisper, Tesseract, OpenCV)
- **Automation & messaging:** n8n, WhatsApp Cloud API (messaging, templates, calling), Messenger & Instagram APIs, Telegram Bot API, Apps Script
- **Data & backend:** Supabase (PostgreSQL, row-level security, Edge Functions, pg_cron, Realtime), SQL, REST APIs, Web Push
- **Front end & devices:** JavaScript, HTML/CSS, Progressive Web Apps, Flutter/Dart, Vercel, ESP32 sensors

EXPERIENCE

Artificial Intelligence Specialist May 2026 – Present

PT Mitra Makmur Borobudur (Honda Dealer & AHASS Service) • Tangerang, Banten • Hybrid

- **Superfast WhatsApp platform:** the dealer's own WhatsApp Business platform on the Cloud API, built to replace a paid vendor: shared inbox for 1,100+ conversations, fair lead auto-assignment, templates, in-browser calling (WebRTC), phone notifications, and Messenger and Instagram DMs in one inbox.
- **Production reliability:** after two slowdowns, rebuilt the webhook to store first and acknowledge instantly, with automatic retries, index-only lookups and a load test before each release.
- **Telemarketing performance:** per-agent reply-speed (SLA) grading from the company's rules, a lead → SPK → delivery funnel, incentive estimates and Excel export.
- **Customer-lifecycle automation (n8n + Supabase):** KPB service reminders, STNK/BPKB-ready notices, booking and thank-you messages, cross-selling campaigns, and a daily management report posted to WhatsApp.
- **HR & attendance:** Flutter app and PWA with face verification, per-branch GPS geofencing, automatic clock-out, self-service leave with push approvals and a live HR dashboard.
- **Sales, stock & workshop:** prospect tracker with follow-ups and deal/SPK tracking, stock allocation with approvals, and a 10-lane workshop TV board with ESP32 auto-start.
- **Website & security:** hondaborobudur.com with a 20,900+ item parts catalog and a staff CMS; a database audit cut privileged functions callable without login from 99 to 13.

KEY PROJECTS

- **n8n Finance Operations Suite** (github.com/basmarabintang-source/n8n-finance-workflows): six connected workflows (vendor control, AP 3-way match, payment run, bank reconciliation, AR collections, HR onboarding) that catch a forged bank-account change on demo data.
- **Arzopa** (github.com/basmarabintang-source/arzopa): local AI that turns a voice note or receipt photo into a finance transaction (Whisper, Tesseract, OpenCV), with no third-party AI APIs.

CERTIFICATIONS

Certified Ethical Hacker (CEH), EC-Council (Jul 2024 – Sep 2027) • **Claude Code in Action**, Anthropic (Jul 2026, ID 8btum6zi35yu) • **Introduction to Claude Cowork**, Anthropic (Jun 2026, ID vads9u3m7rbs) • **AI Fluency: Framework & Foundations**, Anthropic (2026)

EDUCATION & LANGUAGES

Education: self-directed study in AI, automation and software engineering • **Languages:** Bahasa Indonesia (native), English (professional)
